## Andy Collins Senior Designer

Andy is a Senior Designer and brings a wealth of design knowledge having obtained his Degree in Exhibition Design over 30 years ago at Lincoln University UK. Andy has worked continually in the industry since then, including an 8 year stint as a Design Lecturer at UTS Sydney... And we thought Brett was old.

Andy specialises in creating cutting edge exhibition and retail designs. He has worked across a broad range of clients, industries and countries notably automotive, medical, retail and has won numerous design awards - all with budgets ranging from just a few thousand to multi-million dollar projects.

It's often joked around the office that Andy is so creative that he has created a world all of his own in which he visits regularly. We have branded this world as 'Andy Land'; a magical land that has synergy and everything makes total sense. It's a world with a population of one.

Although originally born and raised in the UK, Andy has been a proud Sydney Northern Beaches resident for nearly 30 years. With an insatiable love of the outdoors he is partial to the odd mountain biking or paddle boarding adventure, he can also often be found at his favourite hanging spot, Andy Land.
