

TWF STAFF PROFILES

Jodie Kahukiwa General Manager

After being in the industry for approximately 15 years, Jodie thinks she knows it all, and annoyingly she kinda does....

Starting out in retail fit-outs for one of the trendiest brands at the time, she soon realised she had a natural talent for organisation and being extremely bossy (*in a nice way of course*) and went on to become an amazing Project Manager.

Since then she has gone on to manage projects for large internationally renowned companies to small boutique companies across many different industries and she values every client equally.

In the past 8 or so years, Jodie's roles have also included General Management of the business and staff. She has a good understanding of the business across the board, and appreciates how important it is to maintain good working relationships with everyone around her.

Spreadsheets are her favourite tool.

On a personal note, she is a mother of three, loves animals, the four legged cantering type are her favourite, loves swimming and being near the ocean but also loves the country life.... So when she wins the lotto, she's going to buy acreage next to the beach.
